## How it works:

When you are: in a meeting, too busy, at lunch... calls are diverted to your *special number* at EOS Communications.

Calls are answered in *your company name* according to your preferred form of words

We hold an *agreed profile* of your Company to enable our team to answer professionally and know (for example) the names of people in your company, the main products/services etc.

We will *screen out* (as far as possible) unwanted calls such as cold sales calls if you wish.

We *take messages* and send them to you within 15 minutes by email, text, fax or call you with a verbal summary.

We can *divert calls* to your mobile and if the mobile is engaged or unobtainable, the call goes to the EOS answering service.

***Never miss that important call!***
